

Blueprint for Success

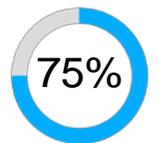

Of all the technology implementation projects* started in a given year, only...

are completed on time

deliver the expected results

of user's actually adopt the new system (if you're lucky)

However, at **School Improvement Network**, we are all about...

of teachers effective of students ready for college and career of our partner schools successful

The **Success Blueprint** training course prepares district and school administrators to be intentional about the implementation of Edivate in their districts and schools. The course includes the first three phases of our Implementation Framework and empowers administrators to integrate Edivate into their professional development strategy and plans.

Edivate Features and Possibilities

Goals, Objectives, & Alignment

Three Month Action Plan

In this course, district and school administrators will:

- Develop achievable professional development goals
- Draft an action plan specific for their schools
- Discuss communication strategies that increase overall adoption and use

Make professional learning part of what you do, not one more thing to do.
