

TASK: Planning Powerful Learning K-12 Classrooms

August 28 and October 17, 2012

Workshop #068-12

Student learning is the product of three factors: what the teacher brings to the classroom, what the students bring in terms of schema and background, and finally, the actual content of the lesson. These come together in task. How do teachers plan tasks that maximize learning? What are the components of a powerful task? Join John Antonetti for two days of designing and developing powerful, engaging student tasks for K-12 students in all content areas. While the work is complex, John will help us simplify the design process and use humorous anecdotes to illuminate the construction of optimal learning activities.

- Discover how engaging qualities, cognitive demand, level of thinking and student engagement interact to build powerful task.
- Analyze student work to look for the components of powerful tasks.
- Create and share powerful learning tasks to be used back at home in the classroom.

NOTE: Previous workshop experience with John Antonetti is not a prerequisite.

Presenter John Antonetti, Colleagues on Call

*John Antonetti is former Director of K-12 Curriculum in the Sheridan School District in Arkansas. Once described by Larry Lezotte as a “teacher’s teacher,” John is an advocate of experiential education and recognizes that all learners learn best when they work together to solve real world problems in safe, cooperative environments. He provides schools and districts with on-site instructional analysis and follow-up support through workshops, coaching and classroom demonstration models. While hands-on work in schools is his passion, John is also a highly-sought keynote speaker. His humor and parables are recognized by teachers, administrators, and parents as relevant examples of the power of teachers. John is author of the book, *Writing as a Measure and Model of Thinking*.*
